

INFORMATION FROM SUNNHORDLAND INTERKOMMUNALE MILJØVERK IKS

New waste collection from 9 April

Get ready for the new waste collection scheme

A new arrangement for waste collection will be introduced from 9 April in the SIM municipalities. This new scheme means that you will have your waste collected every second week, as well as introducing a collection of plastic packaging.

Our goal is to facilitate waste management that is in the best interests of the environment, the waste management employee and the customer. The new scheme requires fewer vehicles and therefore generates fewer emissions. More vehicles with two chambers means that more types of waste can be collected

simultaneously. Side loading with a lifting arm provides a better working environment for the waste management employees.

Customers receive a better service with more frequent collections of more types of waste.

On collection day

To streamline collections as much as possible, it is important that the

containers are facing the right way on collection day. The containers should be positioned with their opening (the lid) facing the road.

To ensure collections run smoothly, a little space is required around the containers. It is therefore important that they are not standing too close to any fences, vehicles or bin stores/stands.

See otherwise the final page.

Do you have questions about the scheme?

Please get in touch if you have any feedback, praise or suggestions for things could change that might make the waste management scheme even better.

Telephone +47 53 45 78 50
or sim@sim.as

Side loader with two chambers (waste + bio).

Rear loader with two chambers (paper + plastic).

This is how the new scheme will work:

SIDE LOADER WITH TWO CHAMBERS

Every other week:

Collection of waste + biowaste, same day

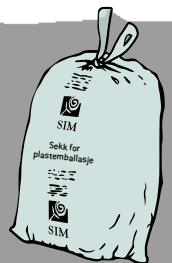

REAR LOADER WITH TWO CHAMBERS

Every fourth week:

Collection of paper + plastic packaging waste (in bag), same day

What should you do when you are running out of plastic packaging bags?

You will receive a new bag for plastic packaging by hanging/tying an empty bag on your paper container.

See also the new collection calendar for your municipality.

Changes to collection days

Most of our customers will have the same collection day as before, but the new waste collection scheme will lead to amended collection days for some (marked in yellow).

AUSTEVOLL

Monday

Stora Kalsøy–Hundvåko–Storebø (south of Birkeland crossroad–Eidsbøen)

Tuesday

(NB! New collection days for customers in this area)

Put out the container on collection day. Remember that the container must be out by 06:00. Remember to retrieve the container after collection.

Ensure the container is facing the right way. Make sure that the opening is facing the road so that the lifting arm can grip the container.

The new waste collection vehicles will collect *waste* + *biowaste* every other week. Remember to put out both containers on collection days.

The new waste collection vehicles will collect *paper* + *plastic packaging* every fourth week. Remember to put out the container + plastic bag on collection days.

Avoid overfilling the container. The lid must wholly cover it.

It would be helpful if the waste and biowaste containers are grouped together.

You can get a new bag for plastic packaging by hanging/tying an empty bag to your paper container.

You can also collect new bags at your nearest recycling centre.
